COVER (Pag. 170)

La struttura è in alluminio ed è dotata di speciali bande magnetiche alle quali è possibile applicare o rimuovere in breve tempo e con semplicità tutte le cover presenti nella collezione. Questa unicità costruttiva consente di cambiare colore o finitura della vetrina in pochi minuti e permette altresì l'unione di più vetrine insieme presentando l'aspetto di un manufatto unico.

The frame structure is made of aluminum and is equipped with special magnetic strips to apply or remove quickly and easily any available cover from our collection. This unique construction allows to change the colour or finish of the display case in a few minutes and also makes it possible to join more units together giving the appearance of a single unit.

La structure du cadre est en aluminium et elle est équipée de bandes magnétiques particulières auxquelles il est possible d'appliquer ou enlever rapidement et facilement toutes les couvertures COVERS disponibles dans la collection. Cette construction particulière permet de changer la couleur ou la finition du cadre en quelques minutes et également rendre possible la jonction des vitrines donnant l'apparence d'un seul artefact.

Struttura in alluminio	Aluminium structure	Structure en aluminium
Cover in laminato/HPL	Laminate/HPL cover	Cover en stratifié ou laminé haute pression/HPL
Porte scorrevoli, fianchi e top con vetrocamera - protezione UV	Sliding doors, sides and top in double glass - anti-UV protection	Portes coulissantes, les côtés et le dessus en double vitre - protection anti UV

Online builder · Outil de configuration en ligne

Le cover della Teca M sono costruite in laminato o HPL. Sono disponibili due cover (grandi e piccole) nelle tre versioni H/M/C.

Teca M covers are made in laminate or HPL. Two types of cover are available (large and small) in the three H/M/C versions.

Les COVER de Teca M sont réalisés en stratifié ou en HPL. Elles sont disponibles en deux tailles (grande et petite) et dans les trois versions H/M/C.

L'applicazione della Cover è magnetica. A richiesta la vetrina può essere fornita con Cover già applicata.

The fixing of the cover is magnetic. On request Teca M can be supplied with the Covers already fixed.

L'application de la Cover est magnétique. Sur demande, la vitrine peut être fournie avec Cover déjà appliquée.

Per unire due o più vetrine insieme occorre rimuovere i profili angolari ed avvitare le staffette fornite insieme alla Cover "U".

To join two or more Teca M units together, the corner profiles must be removed and it is necessary to screw the brackets supplied with the Cover "U".

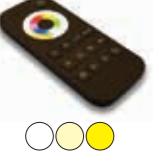

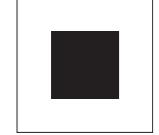

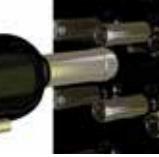

Pour joindre deux ou plusieurs vitrines il faut supprimer les profils angulaires et visser les supports fournis avec la Cover "U".

Applicare la Cover "U" magnetica per coprire il punto d'unione, rifinire ed armonizzare la composizione.

Fix the "U" magnetic Cover to hedge the juncture between the showcases, finishing and harmonizing the composition.

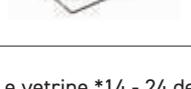

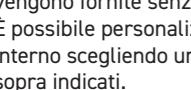

Appliquer la Cover "U" magnetique pour chacher et terminer le point d'union entre les vitrines.

OPTIONAL

CODE	DS	Disponibile Available · Disponible	Non disponibile Not available · Non disponible		
	OPT-RGB	Controller RGB RGB controller Regulateur RGB	Tutte le vetrine All units Toutes les vitrines	-	Installazione impianto led RGB (30 led/m - 7,2 Wm - 550 lumen/m - 12 V) in sostituzione dei led bianchi standard. Telecomando per gestione colori, programmazione effetti ed intensità luminosa. Il colore bianco dei led RGB è bianco freddo (6.000-6.500 K). Replaces standard white LEDs with RGB LEDs. Various colours, lighting effects and dimming can be selected with the included remote control. RGB's white hue is very cool (6000-6500K). We suggest not using the RGB LEDs for cold dish and cured meats/cheese units.
	OPT-CBD	Controller bianco dinamico Dynamic white controller Regulateur blanc dynamique	Tutte le vetrine All units Toutes les vitrines	-	Installazione impianto led BIANCO DINAMICO (140 led/m - 19,2 Wm - 2.000 lumen/m - 24 V) in sostituzione dei led bianchi standard. Telecomando per gestione colore bianco (variabile da bianco caldo 2700 K a bianco freddo 6000 K). Controllo intensità luminosa. Installation of DYNAMIC WHITE (140 led/m - 19,2 Wm - 2.000 lumen/m - 24 V) setup in place of standard white LEDs. Remote control for white setting (ranging from warm white 2700 K to cold white 6000 K). Dimmer.
	OPT-CIN	Compressore ad inverter Inverter compressor Compresseur onduleur	Tutte le vetrine M / C All M / C units Toutes les vitrines M / C	Moduli B Vetrine H (già di serie) H units (standard) Vitrines H (déjà inclus de série)	Installazione di Impianto frigorifero con compressore ad inverter (funzionamento a giri variabili con elettronica dedicata) - Risparmio energetico 35 % - Riduzione rumorosità 25 % - Disponibile nella tensione 230 V - 50/60 Hz - Installation of cooling system with inverter compressor (variable speed operation with dedicated electronics) - 35% energy saving - 25% decreased noise - Available for 230 V - 50/60 Hz.
	OPT-ABK	All black	Tutte le vetrine All units Toutes les vitrines	-	Verniciatura a polveri epossidiche colore nero opaco di tutte le parti metalliche interne (montanti, pannelli interni, accessori, piano) ed esterne (profili porte, telai, maniglie, carter). A seconda dei modelli, alcuni particolari tipo viti o reggimensole vengono mantenuti in finitura inox. Black matte epoxy powder coating of all internal (beams, internal panels, accessories, shelf) and external (door profiles, frame, handles, flank) metal parts. Depending on model, some details i.e. screw caps or shelf supports remain in stainless steel finish.
	OPT-PCN	Porte colore Nero Black doors Portes noires	Tutte le vetrine All units Toutes les vitrines	-	Verniciatura a polveri epossidiche colore Nero della parte esterna. PARETE (profili porte, telaio di battuta delle porte, maniglie) TECA (profilo porta maniglia). Black epoxy powder coating of the external part. PARETE (door profile, frame, handles) TECA (door profile, handle).
	OPT-VIN	Verniciatura interno nero Internal black coating Partie intérieure laqué noire	Tutte le vetrine All units Toutes les vitrines	-	Verniciatura di tutte le parti interne in alluminio con finitura a polveri colore nero opaco (fianchi, pannelli centrali, tondini, montanti, schiena, base e top). A seconda dei modelli, alcuni particolari tipo viti o reggimensole vengono mantenuti in finitura inox. All internal aluminum parts are finished with matte black powder coating (sides, central panels, rods, strut, back, base and top). Depending on model, some details i.e. screw caps or shelf supports remain in stainless steel finish.
	OPT-RIS	Rivestimento specchio Mirror panel Panneaux miroir	Tutte le vetrine M / C All M / C units Toutes les vitrines M / C	Moduli B Vetrine H H units Vitrines H	Sostituzione del rivestimento interno standard in alluminio anodizzato con un rivestimento in alluminio specchio. A secondo dei modelli, si può inserire il rivestimento a specchio nelle spalle laterali e nella schiena. Replaces the standard anodized aluminium lining with an aluminium mirror coating. Depending on the model, it applies to side and back panels.
	OPT-FCA	Filtro a carboni attivi Activated carbon filter Filtre à charbon actif	Tutte le vetrine All units Toutes les vitrines	-	Filtro a carboni attivi ricaricabile. È possibile estrarre il filtro dalla vetrina e sostituire i carboni in pochi minuti. Permette un naturale ricircolo di aria nelle vetrine vino. È consigliato per le vetrine utilizzate per conservazione che non vengono aperte spesso. Rechargeable activated carbon filter. The filter can be easily removed from the cabinet to quickly replace the coals. It allows a natural circulation of air in the wine showcase. This option is suggested for the showcases used for conservation that are not frequently opened.
	OPT-V1	Vaschetta acciaio inox Stainless steel tray Plateau en acier inoxydable	Tutte le vetrine All units Toutes les vitrines	-	Vaschetta in acciaio inox lucido con bordi piegati a 45 gradi, dim. L x P x H mm 171 x 195 x 15. È possibile posizionare 4 vaschette sia sul piano in vetro da mm 350 x 400 (cioccolato - gastronomia) che sul piano mm 340 x 400 (salumeria). Consente di ottimizzare lo spazio sul piano in tutte le vetrine cioccolato, gastronomia e salumeria. Polished stainless steel tray with edges bent at 45 degrees, dim. L x P x H 171 x 195 x 15 mm. Up to 4 trays fit on each glass shelf 350 x 400 mm (chocolate - cold dishes) as well as on 340 x 400 mm shelves (cured meats/cheese). Useful to make the most of the available space for chocolate, cold dish and cured meats/cheese units.

 OPT-14TH-PR	Piano regolabile (Teca) Adjustable shelf (Teca) Etagère réglable (Teca)

Le vetrine *14 - 24 della serie Teca e Parete vengono fornite senza allestimenti. È possibile personalizzare l'allestimento interno scegliendo uno o più optional tra quelli sopra indicati.

The units * 14 - 24 of the Teca and Parete series are supplied without internal fittings. You can customize the interior by choosing one or more of the options above.

Les modules *14 - 24 de la série Teca et Parete sont fournis sans accessoires. Vous pouvez personnaliser l'intérieur en choisissant une ou plusieurs options parmi celles indiquées ci-dessus.

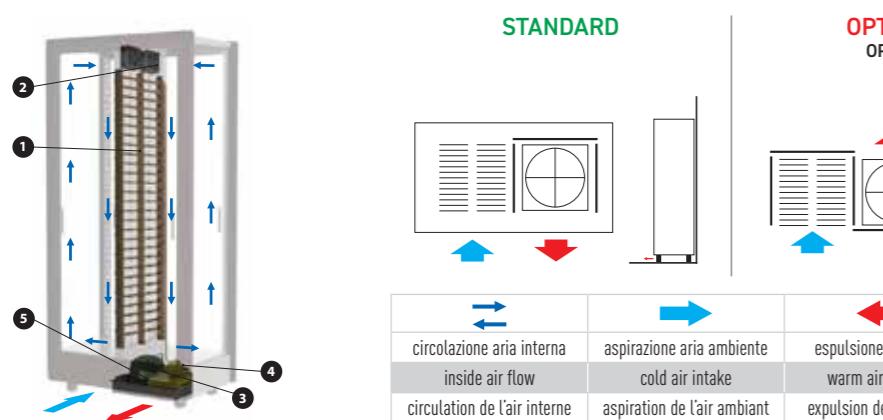

UNITÀ REFRIGERANTE INTEGRATA (STANDARD)

IMPIANTO A REFRIGERAZIONE CENTRALE (brevettato) - condensazione ventilata

Installato su tutte le vetrine profondità (510 - 530 mm)

CENTRAL COOLING SYSTEM (patented) • Installed on all cabinets with (510 - 530 mm) depth

INSTALLATION DE RÉFRIGÉRATION CENTRALE (brevetée) - condensation ventilée • Installé dans les vitrines de profondeur (510 - 530 mm)

La serpentina di raffreddamento ① e le ventole di aereazione interna ② sono inserite al centro della vetrina all'interno dei pannelli di alluminio. Il compressore ③, il condensatore orizzontale con ventola a pala premente ④ e la vasca per l'evaporazione della condensa ⑤ sono inseriti in una speciale vasca ribassata. Con questa soluzione, pur installando un compressore importante (1/4 hp), la altezza della base è limitata (150 mm) in quanto viene utilizzato lo spazio inferiore dove sono inseriti i piedi (40 mm). La circolazione dell'aria di condensazione avviene dalla parte inferiore frontale.

The cooling coil ① and the internal fans ② are installed in the middle of the cabinet inside the aluminium panels. The compressor ③, the horizontal condensing unit, the pushing fan ④ and the vat for the evaporation of the condensation water ⑤ are placed in a special lowered tank. With this solution, despite installing an high power compressor (1/4 hp), the height of the base is limited (150 mm) as it takes up the lower space where feet are located (40 mm). Condensation air circulates from the bottom front part.

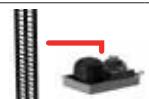

Le serpentini de refroidissement ① et les ventilateurs internes ② sont insérés au milieu de la vitrine à l'intérieur des panneaux d'aluminium. Le compresseur ③, l'unité de condensation horizontale, le ventilateur avec la lame à pression ④ et le bassin de l'évaporation de l'eau de condensation ⑤ sont placés dans une cuve spéciale rebassée. Avec cette solution, même avec un compresseur de grande puissance (1/4 HP), la hauteur de la base est limité (150 mm), car on utilise l'espace inférieur où se trouvent les pieds (40 mm). La circulation de l'air de condensation est soufflé à travers la partie inférieure avant.

Espulsione aria posteriore • Air exhaust at rear • Sortie d'air arrière

CODE			
OPT-EAP	Inserimento di deflettori che convogliano l'aria calda nel lato posteriore. È necessario lasciare uno spazio di almeno 9 cm tra la vetrina ed il muro ed un'apertura nella parte superiore della vetrina che consenta l'espulsione dell'aria calda.	Insertion of deflectors which send the hot air to the back. A gap of at least 9 cm must be left between the cabinet and the rear wall and the corresponding top part must be left open to allow the expulsion of the hot air.	Insertion de déflecteurs qui véhiculent l'air chaud vers l'arrière. On doit laisser un espace d'au moins 9 cm entre la vitrine et le mur et une ouverture dans la partie supérieure correspondante pour permettre l'expulsion de l'air chaud.

UNITÀ REFRIGERANTE REMOTA esclusa vetrine H

Predisposizione unità remota • Setting for remote compressor • Prévision de compresseur déplacé

OPT-PUR

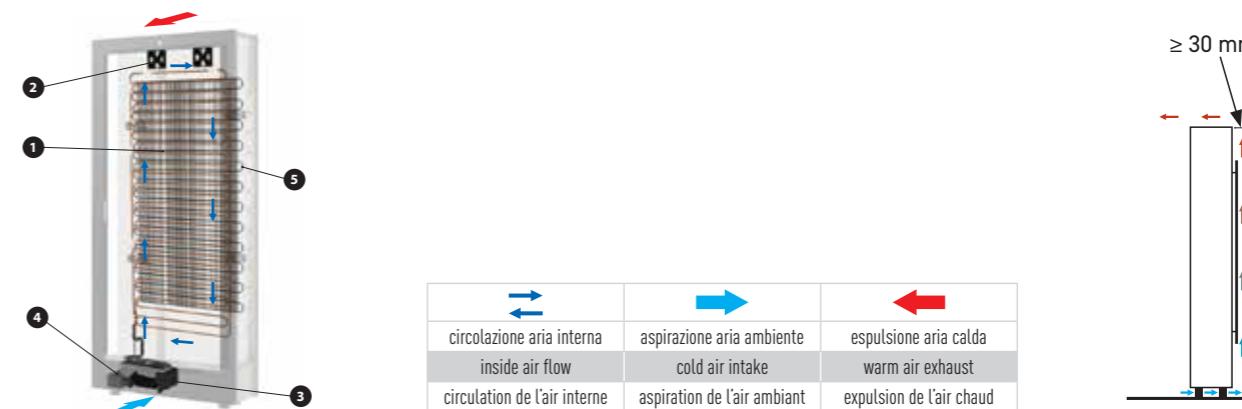

Le vetrine sono sprovviste di unità condensatrice. Tutte le vetrine vengono predisposte con valvola termostatica di serie. Le tubazioni per l'accoppiamento alla linea frigorifera sono nella parte inferiore della vetrina. È necessario prevedere una linea di scarico per l'acqua di condensa e l'alimentazione elettrica.

IMPIANTO A REFRIGERAZIONE POSTERIORE - CONDENSAZIONE STATICHA

Installato su tutte le vetrine profondità (350 - 362 mm)

REAR COOLING SYSTEM - static condensation • Installed on all cabinets with (350 - 362 mm) depth

SYSTÈME DE RÉFRIGÉRATION ARRIÈRE - condensation statique • Installé dans toutes les vitrines en profondeur (350 - 362 mm)

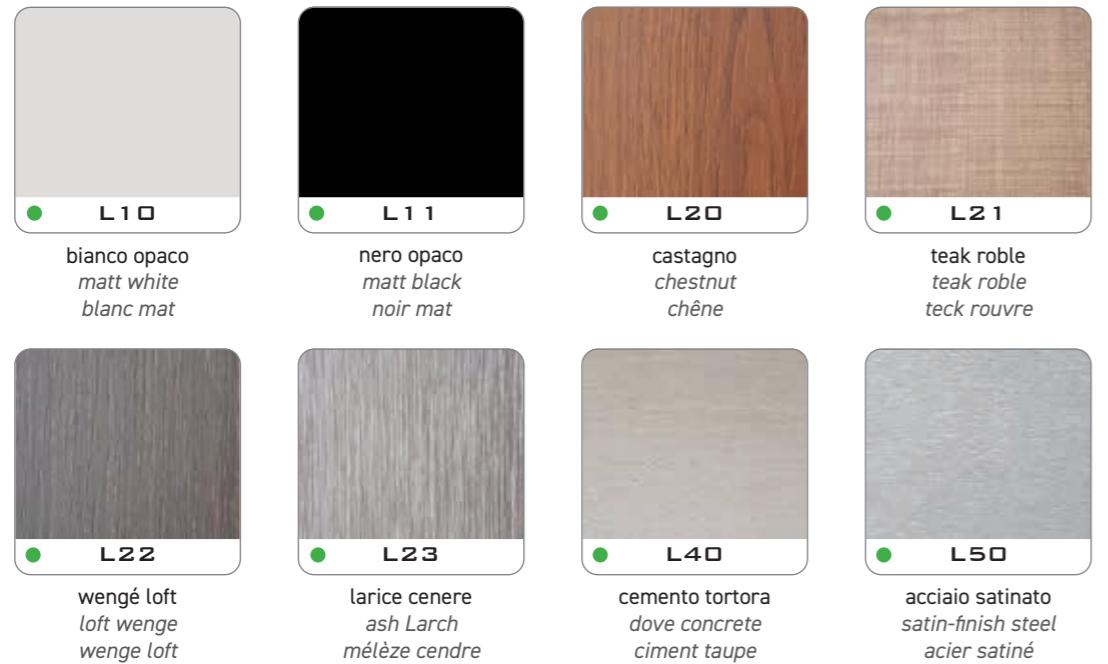

La serpentina di raffreddamento ① e le ventole di aereazione interna ② sono posizionate all'interno del vano refrigerato dietro il pannello posteriore in alluminio. Il compressore ad inverter ③ e la vasca per l'evaporazione della condensa ④ sono inseriti nella base inferiore. Il condensatore statico ⑤ è installato nel retro della vetrina. Il raffreddamento del condensatore avviene per convezione senza l'ausilio di ventole. L'aria ambiente passa sotto la base e sale nello spazio tra il retro della vetrina ed il muro, si scalda ed esce dall'alto.

The cooling coil ① and the internal aeration fans ② are placed inside the refrigerated compartment, behind the aluminum back panel. The inverter compressor ③ and the evaporation pan ④ are placed in the lower base. The static condenser ⑤ is installed in the back of the cabinet. The condenser cools down due to convection without the use of fans. Ambient air comes through under the base and rises in the gap between the back of the cabinet and the wall, gets warm and exits from the top.

Le serpentini de refroidissement ① et les ventilateurs internes ② sont positionnés à l'intérieur du compartiment réfrigéré derrière le panneau de fond en aluminium. Le compresseur onduleur inverter ③ et le réservoir d'évaporation de condense ④ sont insérés dans la base inférieure. Le condenseur statique ⑤ est installé à l'arrière de la vitrine. Le refroidissement du condenseur se fait par convection sans l'aide de ventilateurs. L'air passe sous la base et s'élève dans l'espace entre l'arrière de la vitrine et le mur, il se réchauffe et s'échappe vers l'haut.
